Comment on course strengths and/or weaknesses:

Comments
The material is challenging... it's calculus. But if you do your part: go to REACH, study, and do practice problems... you will succeed.
Followed course schedule and covered everything without much rush. Calculus itself if pretty hard, but overall he did a decent job teaching.

Comment on instructor strengths and/or weaknesses: (Jacob Townson)

Comments
He is a very nice and funny guy. this makes for a great recitation class, where I can learn more about what I was not able to understand in class.
Does a great job of simplifying material so that students are able to better understand it!
He was good, nice, and explained things well. Answered all out questions. Was a little slow though, as in the pace of recitation. But overall I enjoyed him and thought he was good.
Had a few hiccups in the beginning with not being clear what the professor expected of us making it hard for us to get the most out of our recitation meetings once we got past that the class became much more helpful.
Makes sure you understand the material and willing to help outside of class
