.
No comment.
a lot of work for a short amount of time
Taught as if we already know the entire course material which hinders the success of students who have never learned any of this content.
Course is incredibly challenging in an unnecessary way for particular majors like mine. Math 180 seems extremely unnecessary for business majors to be mandated to take this course.

Comment on instructor strengths and/or weaknesses: (Jacob Townson)

Comments
–very thorough –extremely helpful –explains things very well
Jacob was an awesome TA to have, he helped me understood the material most in this class. He was very personable and did a really good job of helping us understand things better.
very good at giving us examples to work in class and works them out; good at getting back to you on email when he says he will
Cares about his students and explains concepts and topics well
Great guy & great teacher!
He is the only reason why I will even pass the course. I learn all of my skills during his once–a–week recitation period. Wonderful teacher. Explains using clear and concise language.
Very helpful and broke everything down
He took a class that I originally thought was pointless and turned it into one of the highlights of my week. He kept class fun and interesting. He understood the students and worked with us until we knew what we were doing.
Very accessible outside of the classroom and took time to explain concepts to his students. He was always focused and adaptive. He really wanted his students to succeed and what go out of the way to ensure understanding for everyone
Honestly, too nice, and slightly a push over. At times it can get in the way of actually learning, b/c he wastes time doing things like asking if everyone is ready to move on before erasing things.
