

Math 105-30 Summer Term III
Make-up Quiz 1

Name: _____

Show all work to get full credit of this 25 point quiz. You are allowed to use your notes and book, but not your friends. All calculators are allowed, except for phones.

- 1.** (*5 points*) Solve for P (round to the nearest hundreth):

$$\$5000 = P(1 + 0.07)^8 \quad (1)$$

- 2.** (*4 points*) Give the Equation of the Future value of Compound Interest (compounded annually). Define all the variables you use.

- 3.** (*5 points*) The population of the world in the year 2000 was 7.0 billion. This was a 18% increase over the population in 1990. What was the population of the world in 1990?

4. (*6 points*) If you deposit \$6000 at 8% annual compound interest for 12 years, what will the value be if the compounding is:

- (a) Annual
- (b) Semi-Annual
- (c) Quarterly
- (d) Daily

5. (*5 points*) An ad for interest rates on certificate of deposit (CD) advertises a CD with a minimum deposit of \$20,000 and an APY of 1.18%. If you invest the minimum amount, what will the value of this investment be at the end of a 6 year period? Round your answer to the nearest dollar.
