I think the second unit was considerably harder than all other units in the course.

This was a great math course to start out my college career. Not too difficult but just challenging enough that it required effort. Since it was more of a lecture course, I didn't get a chance to ask questions. I tend to learn math better one on one, so sharing a professor with forty other people wasn't exactly my favorite part of the class.

i like this class because it provides information about math that will be necessary outside of college

It has clear application to real life scenarios making it more enjoyable to learn math.

It was a math class so it wasn't my favorite but would recommend since it is a requirement.

I was lost sometimes in this class because some of the techniques he used in class weren't at all the same as the book and it really confused me.

As far as recitation instructors go, I'm glad I got Jacob. He was very good at reviewing the content we had gone over with Professor Wildstrom and helped me to feel much more prepared for quizzes and exams that we would have in recitation that day.

Provided lots of examples and was open to letting the class be in charge of what we go over.

He taught a little different so sometimes his ideas were easier to understand.

I liked him a lot, very nice and understanding

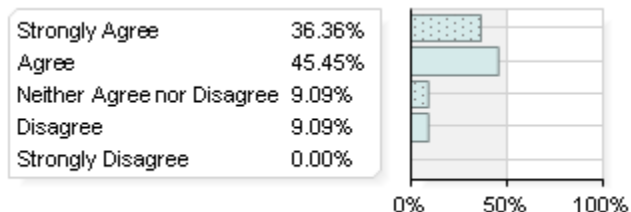

This class was confusing because the way Wildstorm did some things Townson would do it differently like how the book showed it and it just got to be confusing at some points especiallly before a quiz.
