Comment on course strengths and/or weaknesses:

Comments

This course relates to real life scenarios and is extremely helpful! As an adult student, this course was amazing. I wish the athletes and younger adults in the class took it as seriously.

N/A

Material is practical and the textbook is easy to follow.

Comment on instructor strengths and/or weaknesses: (**Jacob Townson**)

Comments

Jacob is extremely helpful and always willing to meet after class for any students help. He may be a bit too kind because other students take advantage of him and interrupt class, leave early, and come in late on a daily basis

Great Instructor! Good teaching methods and great class. I will recommend to anyone else that needs a non-major math class, especially summer term.

However, one small note – please consider the importance of repetition, which includes repeating explanation or definition of something, when someone asks. For many, this is a method of retaining info better :-). Thanks!

Communication skills were not very well

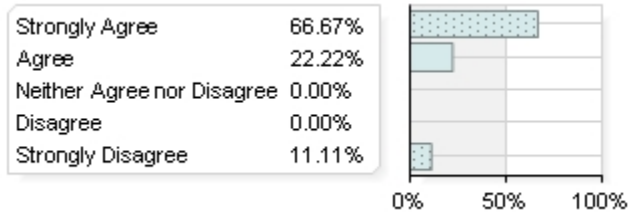

The instructor was helpful and easy to understand. He made sure we understood the content and was always available to assist us if we needed him. Very patient as well.
